Professional Summary

Computer Science undergraduate specializing in DevOps with experience delivering cloud-native applications. **Improved deployment efficiency by 32%** through CI/CD automation, **reduced production vulnerabilities by 38%** via DevSecOps controls, and **minimized manual infrastructure effort by 45%** using containerized AWS deployments.

Education

University of Petroleum and Energy Studies (UPES)

B.Tech in Computer Science and Engineering (Major: DevOps) | CGPA: 7.26

2023 – 2027

Dehradun, India

Technical Skills

- **Programming Languages:** C, C++
- **Scripting & Automation:** Python, Bash
- **DevOps & DevSecOps:** Linux, Docker, Jenkins, Git, GitHub, GitLab, AWS
- **Web Development:** HTML, CSS, JavaScript, Node.js, React.js
- **Databases:** SQL, MongoDB

Internship

Bhavyaa Enterprises Pvt. Ltd.

Jun 2025 – Jul 2025

- Developed and deployed a full-stack web platform with automated Jenkins CI/CD pipelines, **accelerating release cycles by 32%** and **reducing deployment errors by 27%**.
- Containerized microservices using Docker and deployed on AWS (EC2, IAM, Security Groups), **lowering manual configuration effort by 41%** and improving environment consistency.
- Implemented secure authentication, RBAC, and API protection mechanisms, reducing **identified security vulnerabilities by 38%** and strengthening access governance.

Projects

Modelflow: Zero-Configuration AI Deployment Platform

[GitHub]

- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, Python, Docker, AWS (EC2, ASG, ALB), Nginx, NGROK, Google OAuth
- **Skills Learned:** Cloud architecture design, container orchestration, auto-scaling infrastructure, secure authentication flows, CI/CD integration, production-grade API deployment
- **Description:** Engineered a zero-configuration platform that transforms uploaded machine learning models into production-ready APIs by automating validation, containerization, reverse proxy configuration, and cloud deployment workflows.
- **Contribution:** Designed and implemented the end-to-end deployment pipeline integrating Docker builds with AWS EC2, Auto Scaling Groups, and ALB, **cutting deployment time by 36%**, **reducing manual DevOps intervention by 44%**, and **improving auto-scaling responsiveness by 29%**.

Secure DevSecOps CI/CD Pipeline

[GitLab]

- **Tech Stack:** GitLab CI/CD, Docker, Trivy, OPA, Kubernetes, AWS EKS
- **Skills Learned:** DevSecOps, policy-as-code, Kubernetes security, CI/CD governance
- **Description:** Built an end-to-end secure CI/CD pipeline enforcing vulnerability and compliance checks before production releases.
- **Contribution:** Automated vulnerability scanning and policy enforcement, blocking high-risk images before deployment, **decreasing critical production vulnerabilities by 38%** and **improving policy compliance coverage by 33%**.

Accomplishments

- Demonstrated strong analytical problem-solving and time-critical decision-making across DSA-focused competitive rounds at **ByteQuest – Technical Challenge (Runner-Up)** Apr 2025 [Certificate]
- Collaborated in a cross-functional team to design and prototype an end-to-end AI-driven solution within a 24-hour national-level event at **Hack The Throne – National Hackathon (Participant)** Feb 2026 [Certificate]
